SAMPLE GENERAL HOSPITAL

Outpatient Medical Report | Department of Internal Medicine

Patient	Rahul Verma (fictional)	**Report No.**	MR-2026-004217
Age / Sex	42 years / Male	**Date of visit**	28 October 2026
Patient ID	P-100482	**Consultant**	Dr. A. Sharma, MD (Internal Medicine)
Blood group	B positive	**Visit type**	Outpatient follow-up

1. Presenting Complaint

Burning sensation in the upper abdomen after meals for the past 3 weeks, worse at night and when lying flat. Occasional sour taste in the mouth. No vomiting, no black stools, no weight loss, no chest pain or breathlessness.

2. Medical and Personal History

Past history: Mild hypertension (diagnosed 2024). No diabetes. No previous surgeries.
Medications: Amlodipine 5 mg once daily.
Allergies: No known drug allergies.
Lifestyle: Non-smoker. Occasional alcohol. Irregular meal timings, frequent spicy and late-night meals.
Family history: Father has hypertension.

3. Vital Signs

Parameter	Result	Reference range
Blood pressure	132 / 84 mmHg	Below 120 / 80 (ideal)
Pulse	76 beats/min	60 - 100
Temperature	36.8 C	36.1 - 37.2
Respiratory rate	16 / min	12 - 20
SpO2	98 %	95 - 100
Weight / Height	74 kg / 172 cm	-
BMI	25.0 kg/m2	18.5 - 24.9

4. Examination Findings

General: alert, comfortable, no pallor or jaundice. Cardiovascular and respiratory systems: normal. Abdomen: soft, mild tenderness in the epigastric region, no guarding, no organomegaly.

5. Laboratory Results

Test	Result	Reference range	Flag
Hemoglobin	14.2 g/dL	13.0 - 17.0	Normal
WBC count	7,400 /uL	4,000 - 11,000	Normal
Platelets	2.6 lakh /uL	1.5 - 4.5 lakh	Normal
Fasting glucose	92 mg/dL	70 - 99	Normal
Total cholesterol	212 mg/dL	Below 200	High
LDL cholesterol	138 mg/dL	Below 100	High
Creatinine	0.9 mg/dL	0.7 - 1.3	Normal

Test	Result	Reference range	Flag
ALT (SGPT)	28 U/L	7 - 56	Normal
H. pylori stool antigen	Negative	Negative	Normal

6. Assessment

Symptoms and examination are consistent with **gastro-esophageal reflux disease (GERD)**, mild. Borderline raised cholesterol and stage 1 blood pressure noted. No alarm features present.

7. Plan and Advice

Medication: Pantoprazole 40 mg once daily, 30 minutes before breakfast, for 4 weeks. Continue amlodipine 5 mg.
Diet and lifestyle: Smaller, regular meals; avoid spicy and fried food; no food 3 hours before sleep; raise the head of the bed; reduce alcohol; walk 30 minutes daily; reduce salt.
Follow-up: Review in 4 weeks with repeat lipid profile and blood pressure check.
Seek urgent care if: black or bloody stools, repeated vomiting, difficulty swallowing, chest pain, breathlessness or unexplained weight loss.
